Skills

- React | Redux Toolkit | Next JS | Express | Typescript | SASS | Material UI | Node.js | JavaScript | CSS | HTML | C/C++ |

Projects

Admin Dashboard

- Built a responsive admin dashboard (React.js, Material UI) for user-friendly management.
- Implemented interactive Nivo charts (bar, pie, line, geography) for data visualization.
- Developed a comprehensive employee data management system.
- Integrated FAQ, calendar, and profile form for streamlined workflows.

GitHub Repo: <https://github.com/Laibah-Shahid/Admin-Dashboard>

Brainwave AI

- Built with React.js for a smooth, responsive, and user-friendly experience across all devices (desktop, tablet, mobile).
- Sleek and modern aesthetic, prioritizing clarity and ease of use for a delightful user journey.
- Streamlined workflows and clear instructions for seamless AI interaction.
- React's future-proof architecture ensures the UI can adapt and integrate seamlessly with future advancements in AI technology.

GitHub Repo: <https://github.com/Laibah-Shahid/Brainwave-AI>

To-do App

- Built a functional todo app using React.js for managing tasks.
- Users can add new tasks, mark them as completed, and delete unwanted ones.
- The app provides an intuitive interface with clear task display and editing capabilities.
- Leverages React's component-based structure for maintainable and reusable code. (Highlights code organization)

E-Commerce Site

- Developed a multi-page e-commerce website with user-friendly navigation (homepage, product pages, about us, order, blog, contact).
- Designed a responsive layout for seamless user experience across all devices (desktop, mobile, tablet).
- Built the site using HTML, CSS, and JavaScript, ensuring a customizable and flexible foundation.
- Implemented strong foundational code for future expansion and integration of additional e-commerce features. (Focuses on future scalability)
